SHAFT

METAL SHAFT STRUCTURES

SHAFT

METAL SHAFT STRUCTURES

01

VSA

SEAMLESS

VSA is the first metal shaft manufactured by Vipal SPA! Perfect for both indoor and outdoor installations, the VSA metal shaft reaches its maximum efficiency if combined with an elevator or home lift with car and landing sliding doors..

03

SLIM

SEAMLESS

Slim shaft is the indoor metal structure realized by Vipal and adapt to narrow spaces. Thanks to the slim design of all metallic parts it allows the maximum light for the available space

02

AF

SEAMLESS AND WITHOUT SILICONE SEALS

AF is the new metal shaft manufactured by Vipal SpA for outdoor installations which does not require silicon seals and with the easy glass assembly from outside. The glass situated out of the beam projections, realizes a nearly endless surface, full-glass effect!

04

S30

SEAMLESS

S30 is the metal shaft manufactured by Vipal SpA, both for indoor and outdoor installations, perfect for home lifts without car doors and for elevators with automatic folding doors. With the glass positioning on the inner side and the wind brackets up the beams, the metal structure S30 guarantees the biggest lift car possible and a smooth and continuous wall on the inner structure.
